Application No. 10/582,000 Docket No.: 3273-0226PUS1

AMENDMENTS TO THE CLAIMS

1. (Cancelled)

- 2. (Currently Amended) A [[The]] rubber-like or rubber-like-material-containing elastic article of claim 1, which is a rubber-like clastic article wherein the article is molding/forming products of made from a rubber-like composition comprising a hydrogenated natural polyisoprenoid having a degree of hydrogenation of 50% or more or a modified product thereof, wherein the molding/forming is accompanied by crosslinking.
- 3. (Currently Amended) The rubber-like or rubber-like-material-containing elastic article of claim 2, wherein the hydrogenated natural polyisoprenoid is a polymer as a product of the reaction of a natural polyisoprenoid with hydrogen in the presence of a hydrogenation catalyst in a solvent.

4. (Cancelled)

5. (Currently Amended) The rubber-like or rubber-like-material-containing elastic article of claim 2, wherein the hydrogenated natural polyisoprenoid has a weight-average molecular weight of 20x 10⁴ or more and a molecular-weight distribution of 2.0 or more.

Application No. 10/582,000 Docket No.: 3273-0226PUS1

6. (Currently Amended) The rubber-like or rubber-like-material-containing <u>elastic</u> article of claim 2, wherein the hydrogenated natural polyisoprenoid is a hydrogenated product of a polymer of isoprene unit derived from *Hevea brasiliensis*, *Ficus elastica*, *Eucommia ulmoides*, or a fungus belonging to the genus *Lactarius*.

- 7. (Currently Amended) A method for producing a rubber-like elastic article, comprising the step of subjecting a rubber composition comprising a hydrogenated natural polyisoprenoid <u>having a degree of hydrogenation of 50% or more</u> or a modified product thereof to molding/forming <u>accompanied by crosslinking</u>.
- 8. (Currently Amended) A [[The]] rubber-like or rubber-like-material-containing article ef-elaim 1, which is a resin modifier comprising a rubber-like polymer that is an hydrogenated natural polyisoprenoid having a degree of hydrogenation of 50% or more, or a modified product thereof.
- 9. (Previously Presented) The rubber-like or rubber-like-material-containing article of claim 8, wherein the rubber-like polymer is a polymer that is a product of the reaction of a natural polyisoprenoid with hydrogen in the presence of a hydrogenation catalyst in a solvent.

10. (Cancelled)

11. (Previously Presented) The rubber-like or rubber-like-material-containing article of claim 8, wherein the rubber-like polymer has a weight-average molecular weight of 20x 10⁴ or more and a molecular-weight distribution of 2.0 or more. Application No. 10/582,000 Docket No.: 3273-0226PUS1

 (Currently Amended) A resin composition comprising a resin and the rubber-like or rubber-like-material-containing article of elaims 8 according to any one of claims 8, 9 or 11.

- 13. (Original) The resin composition of claim 12, comprising 0.1 to 100 parts by weight of the resin modifier per 100 parts by weight of the resin.
- (Previously Presented) A molded article made from the resin composition of claim

15. - 18. (Cancelled)

- 19. (Currently Amended) An article comprising a hydrogenated natural polyisoprenoid latex or a modified latex product thereof, prepared by using the rubber-like or rubber-like material containing article of claim 15 wherein the article is molding/forming products of rubber-like composition comprising a hydrogenated natural polyisoprenoid having a degree of hydrogenation of 50% or more or a modified product thereof, wherein the molding/forming is accompanied by crosslinking.
- 20. (New) The article according to claim 19, wherein the hydrogenated natural polyisoprenoid latex is a product of the reaction of the natural polyisoprenoid latex with hydrogen in the presence of a hydrogenation catalyst.

Application No. 10/582,000

21. (New) The article according to claim 19, wherein the natural polyisoprenoid latex is a latex derived from Hevea rasiliensis, Ficus elastica, Eucommia ulmoides, or fungus belonging to the genus Lactarius.

Docket No.: 3273-0226PUS1
